# Adaptiv Select ETF

## Fund Description

The Fund uses a proprietary momentum identification methodology in an effort to identify the strongest 25 US Large Cap Stocks from a universe of the largest 1000 capitalized stocks in the United States. Any potential constituency changes take place weekly. Advisors and investors have often sought to select individual stocks in order to try and capture both absolute and relative returns. The Adaptiv Select ETF seeks to capture both of the aforementioned using two investment factors observed consistently across many market time horizons: Momentum and Relative Strength.

Market Value%	-0.10%	1.55%	21.20%	21.20%	19.27%
S&P® 500 TR	0.06%	2.66%	17.88%	17.88%	23.09%

Performance data quoted represents past performance and is no guarantee of future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the original cost. Visit <https://adpvetf.com/adpv> for current month-end performance. One cannot invest directly in an index.

## 3 Key Features

**Seeks to identify the strongest 25 large-cap stocks** when the market is in a long-term uptrend.

**Seeks to prevent extended declines** by moving to short-term Treasury Bills, cash, and cash equivalents during long-term market downtrends.

**Reconstituted on a weekly basis.**

## How does it work?

### When Risk-on: Fully invested in 25 Top Ranked Stocks

Risk-on Indicator: When the 5 Day SMA of the benchmark index closes above its 200 Day SMA as determined on the last trading day each week, the exposure of the Adaptiv Select ETF will be 100% in Equities and Constituted in 25 Top Adaptiv Select Ranked Equities. When in this position, the strategy will only change to T-Bills and Cash when the Risk-off Indicator is triggered.

### When Risk-off: Fully invested in T-Bills & Cash

Risk-off Indicator: When the 5 Day SMA of the benchmark index closes below its 200 Day SMA as determined on the last trading day each week, the exposure of the Adaptiv Select ETF will be 100% in 1-to-3-Month US Treasury Bills and cash. When in this position, the strategy will only change to the equity position when the Risk-on Indicator is triggered.

Mr. McMillan has over 12 years of industry experience. Mr. McMillan is a CMT® Charterholder.

## When Fully Invested: Proprietary Ranking Method used to Select Top 25 Ranked Stocks

ETFs use creation units, which allow for the purchase and sale of assets in the fund collectively. Consequently, ETFs usually generate fewer capital gain distributions overall, which can make them somewhat more tax-efficient than mutual funds.

Sector and holdings are subject to changes and are not recommendations to buy or sell any security.

**Market Cap** is the market price of an entire company, calculated by multiplying the number of shares outstanding by the price per share. **S&P 500** is an unmanaged index which is widely regarded as the standard for measuring large-cap U.S. stock market performance. The stock index does not incur expenses and is not available for investment. One cannot invest directly in an index. **Market Value** the amount for which something can be sold on a given market. **NAV or Net Asset Value** of an investment company is the company's total assets minus its total liabilities.

*Investing involves risk, including possible loss of principal. To the extent the Fund's investments are concentrated in or have significant exposure to a particular issuer, industry or group of industries, or asset class, the Fund may be more vulnerable to adverse events affecting such issuer, industry or group of industries, or asset class than if the Fund's investments were more broadly diversified. The Adviser relies heavily on a quantitative model developed by the Adviser, which is used to value and rank investments or potential investments, to provide risk management insights and to assist in reducing extending declines in the Fund's net asset value. When models and data prove to be incorrect, misleading, or incomplete, any decisions made in reliance thereon will expose the Fund to risks.*

Carefully consider the Funds' investment objectives, risk factors, charges and expenses before investing. This and additional information can be found in the Fund's prospectus and Summary Prospectus, which may be obtained by visiting <https://adpvetf.com/investor-materials>. Read the prospectus and Summary Prospectus carefully before investing.
